

**Resolution establishing Regulations for Parking Permit for  
Construction Vehicles in the Village of Cooperstown  
Local Law 5 of 2016**

The following regulations apply to a permit for on-street parking of construction vehicles in the Village of Cooperstown so that the vehicle is not subject to time limits or paid parking fees when in force.

A parking permit for construction vehicles is hereby established in accordance with the following regulations:

- *A construction vehicle for the purpose of this law is a vehicle, trailer or lift that is required at a job site for the purpose of delivering or storing materials, tools or equipment required at that job site. Vehicles that are primarily used for worker commuting to a job site are not considered construction vehicles for the purpose of this law and are subject to all village parking laws, whether or not they display a permit.*
- *Application for a construction vehicle permit will include the name of the contracting company (vehicle owner), the name and cell phone number of the individual who will be responsible for the vehicle at the job site, the license plate number of the vehicle, trailer or lift. For rented lifts, the license plate or identifying number may be advised by phone.*
- *Each vehicle will display a Construction Vehicle Permit on the driver's side dashboard of the vehicle or attached to any trailer or construction equipment.*
- *There will be an annual (calendar year) registration fee of \$25.00 per vehicle, trailer or construction equipment. No fee will be charged for rented lifts.*
- *Permits are available for purchase on weekdays during normal business hours. In addition, the Village Clerk may schedule occasional evening hours and weekend hours for the sale of permits with the approval of the Board of Trustees.*
- *The parking permit for construction vehicles is valid only for the specific vehicle for which it is issued.*
- *Permit holders must contact the Cooperstown Police Department at 607-547-2500 and leave a message with them prior to using on-street parking when they will exceed the posted time limit or when they will be parking in a paid parking area. The message must include the address where work is being performed and the number of hours or days that the vehicle or vehicles will be at that job site, and the license plate number of the vehicle, trailer or lift. Extensions of time at a job site shall be advised to the police department in person or by phone.*

- *Cones may only be used for safety reasons or to preserve a parking space at a job site.*
- *Any construction vehicle parking in a paid parking space, when paid parking is in force, shall also be required to have a downtown paid parking permit (\$25.00 fee).*
- *Violations of the provisions of this law are subject to a fine of \$75.00 for a first offense and a one-year (calendar year) suspension of the construction vehicle parking permit for the said vehicle for a second offense. Violations shall include:*
  - *Giving false information about the location and or duration of work;*
  - *Displaying a Construction Parking permit at any location that has not been notified to the police as a job site.*
